Comments: We don't agree with extending the EV trail right behind the homes at the west end of Deer Blvd. The trail would bring too much foot/bike traffic right behind people's homes and private property. It will disturb those residents that live there - increase noise and also people walking/biking through peoples property to get to/from trail to/from Deer Blvd.

we encourage the trail to be routed somewhere else - further back far away from the homes, or not developed at all. There is an existing bike trail beside hwy 6 that should be utilized.

Thank you
