First name: Barbara

Last name: Tomasi

Organization:

Title:

Comments: Thank you for developing a number of plans to address this project, particularly plans C and D. I believe that these are more beneficial than the other options and hope you will adopt one or the other, but personally I would favor Plan C. I also strongly advocate for the Forest Service to NOT conduct any harvesting in stands that are 150 years old or more.

While I am a resident of New York, my husband was born and brought up in Vermont. We have a vacation home on 200 forested acres there and are interested in and very supportive of the efforts Vermont citizens and organizations are putting forth to combat climate change and enhance the role our forests and natural resources play in making Vermont- and hopefully the wider world- a better place for everyone.
