Comments: I am a concerned motorized use citizen. I see our "public land" being taken from us without having a vote or way to voice our opinion. This Lolo revision plan needs to not only leave the small amount of motorized access for dirt and snow that we have left. We also need to reclaim motorized access areas that been lost over the years. Deeming areas as "proposed test area for wilderness" is a loophole being used to take our public land and should also be addressed. It shouldn't be so easy to take the land away from the people.
