Comments: I have reviewed your proposed winter and summer recreation plans and I find the Simi primitive non motorized areas to be excessive. I have rode snowmobiles in many of these area you are wanting to designate as non motorized for over 30 years. I have truly enjoyed these backcountry areas and have only been able to via my snowmobile. I hope that reconsideration for reduction of winter non motorized areas is given. These areas if closed to snowmobiles will discontinue my ability yo access and enjoy these areas. They are too remote for access via other ways. Additionally I believe that snowmobiling leaves very little if any impact on the land and should not be restricted to the very small amounts of land proposed to keep open. I hope that myself and future generations will continue to be able to access the lands we have used for decades via snowmobile.
