Comments: I support Alternative B of the Telephone Gap Project. I am 69 years old and have hunted and fished in the GMNF over 50 years. I have seen a rapid decline of both game and non-game species in the past 25 years due to the lack of early successional forests caused by the lack of proactive vegetative management. Alternative B will improve the biodiversity and health of the forests at a much greater rate than Alternatives C and D of the plan.
