Comments: After reviewing the proposed hut scope document, I am opposed to this private commercialization of our public lands. Having worked for both the USFS as a backcountry ranger and for guiding services in the cascades I can appreciate the balance that needs to be struck. But this is not balanced - the guiding companies are not building or supporting additional public access while also supporting their own commercial enterprise - they are only building for themselves. I believe this sort of project would be more amenable if it included development of publically available shelters alongside the private commerical shelters.
