Comments: To Whom It May Concern,

I write today in full support of Alternative B to log 8200 acres in the Telephone Gap. As a farm and woodland owner in Rutland County, I have personally seen the benefits proper logging on my land over the last 30 years. Through the use of an experienced and trust forester we have done three major cuts on different parts of our woodlands. The benefits to the forest and the animals are tremendous. The fact that this forest tract of the Gap has been ignored for cutting for 80 years is a mistake. True environmentalists take care of their woodlands by proper management in which logging is critical. The National Forest is an asset to all Americans, it is only right to manage that asset properly.

Thanks.
