Comments: I am very concerned about the fact that privately owned ski huts are being proposed for the Mt Baker NRA area. The increase in ski touring traffic that these huts will bring will cause further user conflict in a area that has historically been used for winter motorized recreation. This type of private commercial activity should not be allowed on public lands, regardless if it is seasonal or temporary. For profit industry should not be allowed on public lands. Permitting these huts will cause user conflict and set a dangerous precedent for the future. I implore you to disallow the construction and operation of these huts and leave public access to Mt Baker NRA as it is and has been functioning properly for decades. Thank you
