Title:

Comments: This is a public area. Trails and wilderness used by all who want follow the rules, pay the parking are able to do so. Bringing in private huts is using public land for private profits. There is no other reasons to even entertain these than that. It would not improve the quality of experience for most users but in fact reduce it. I did not think the US Forrest Service has shown why we as tax payers should give a private corporation accessibility to our lands. Other than money which is not what the USFS is supposed to exist for. It seems like this entire idea goes against the core reason it exists.

Off USFS mission statement .

"What is the Forest Service mission?

The mission of the Forest Service is to sustain the health, diversity, and productivity of the nation's forests and grasslands to meet the needs of present and future generations."

How is providing a small # of private citizens special access matching your own mission? It should strive to maximize usage to all while balancing the responsible use of the land.
