Comments: I see the proposal. How do you expect to track supplies back and forth to the huts as needed throughout the seasons? The access roads are difficult enough to travel with one way traffic. How many people can't drive the existing state highways with snow on it? What will be done about traffic control for everyone's safety? Snowmobiles are loud and they start early in the morning. Sometimes snowmobiles get stuck and riders leave late at night because of unforeseen circumstances. Are there going to be travel restrictions on hours of the day?
