First name: Ann

Last name: Duclos

Organization: Pollinator Pathways of Addison County

Title:

Comments: It's imperative we preserve our old growth forests for the health of our population and to help mitigate the effects of climate warming. Do not cut the trees at Telephone Gap. Vermont is facing such bad effects from climate warming - we go from droughts to floods to no snow and devastating winds. Why get rid of the main resource, old forests, which help stave off our climatic tragedies.
