Comments: Since we had a few more days I would like to elaborate on my comment ID 62960-5662-458 on Pg. 107 item 07 it says harvest up to 144MMBFper year but on pg.106 item 01 says you are annually projecting only 44MMBF. I feel planning to harvest 144MMBF per year will restore health to the forest and the local economy and keep pace with the rate the forest is dying, this will also reduce the severity of fire /smoke damage.

ALSO

Adding back the "green slip" program will encourage local residents to start rebuilding the forest industry in our communities.
