Comments: I object to logging old growth forests!

Put Telephone Gap on hold at least until early 2025, when the US Forest Service does a nationwide Forest Plan amendment process.

Let's take action to ensure that Vermont is a nationwide leader in meeting the Biden Administration targets for old-growth forest protection and advancing needed climate-smart forestry practices

Let's do all we can to preserve the gift of this large mature and old-growth forested area-- to help with climate change, to promote biodiversity and to care for the wildlife who call it their home.
