Title:

Comments: Public Comment LoloNF Revision Plan

No more Canadian Gray Wolves, No more Grizzly Bear Management Units.

More active management: logging, clearing of combustibles, noxious/invasive weed control.

Increase public access via road and trail repair/maintenance will also improve wildfire 'management'.

Public Lands for public use.

Establishing 'wilderness' is not beneficial to plants, wildlife, or humans - unsustainable; an approach of Responsible Stewardship is superior and improves the forest health.
