Title:

Comments: I would request the U.S. Forest Service to select Alternative C or Alternative D to ensure that the Telephone IRP meets forest plan goals while showcasing how to protect and recruit late-successional and old-growth forests for carbon storage, late seral wildlife habitat conditions, and structurally complex forest conditions.

Thank you for developing these alternatives.

Also, please do not harvest stands that are over 150 years old.

Thank you for allowing public comment on this project.
