Comments: This plan would have a devastaing impact on parking, trail use and burden the already overcrowded parking and use areas, How will the funds for grooming, plowing and emergency services be provided?

Grooming funds come from snowmobile registrations and having these types of FOR PROFIT leases would overwhelm the trail system, parking, EMS. This is and usafe proposal that has had very little foresight put into it. If the USFS would like to earn some revenue they should look at what thier name means FOREST SERVICE, start having thinning sales, selective logging, do some acual FOREST SERIVCE, you are not the park service, these lands should be managed for timber harvesting as sustainable crop.

To have these for profit leases is a bad idea for all users of USFS

The snowmobile clubs offer a warming hut to ALL users free of charge, the saftey and shelter they offer are priceless, please do not lump in a permit appliction for a free winter shelter with a FOR PROFIT commercial use tent!!!
