Comments: The Telephone Gap Logging Project is identified as one of the 10 worst climate projects in the U.S. by Climate Forests. The plan includes logging of >80 year old trees, critical members of our forest ecology, which will reset the clock on our forest's healing from irresponsible logging of the past. If this plan goes forward we will experience the loss of biodiversity firsthand as well as secondary consequences like increased flooding and pesticide runoff. PLEASE STOP THE TELEPHONE GAP LOGGING PROJECT!!!!!!!
