Title:

Comments: I wholeheartedly endorse Alternative B of the Telephone Gap Integrated Resource Project. Alt B will enhance forest health and resiliency of the project area, as described in the science-based environmental assessment that was prepared by the professional foresters, wildlife biologists, ecologists and others of the United States Forest Service. The proposed activities will maintain and create wildlife habitats, improve carbon sequestration - thus complementing other climate change reduction initiatives - while also supporting local economies and the responsible stewardship of Vermont's renewable natural resources.
