Comments: I do not agree with adding additional huts that are not for backcountry snowmobiling emergency use within the designated snowmobile usage areas. However I'm not against them being placed in areas for non motorized use as those would more than likely be the user group using them. There is already enough issues with cross country skiers and snow shoes on snowmobile trails making a dangerous conditions when they meet on the trail/road because the non motorized group can't get out of the way of a moving machine in the snow fast enough. Also we as the motorized group pay to maintain the trail systems and do work party's in the spring and fall with little or no help from the non motorized group who would like to use them for free. For instance look at all the snopark tickets wrote this year in the snoparks around Mt. Baker area for not having the snopark pass.
