Comments: I do not understand why any trees need to be cut down in Telephone Gap, and therefore reject, totally, your proposed plan. These trees, as I am sure you know, sequester carbon from the atmosphere; provide an intact ecosystem for plants and wildlife; and release oxygen and water vapor to the atmosphere. Not to mention that they are living beings in their own right. Please do not end their lives in the name of progress, or jobs or the economy. Or for any reason whatsoever!
