Title:

Comments: The idea for these companies to set up shop inside the motorize snowmobile area is a bad idea for several reasons. To start with there are other areas to do so, areas that will keep conflict to a minimum. Another is parking, there is very little parking as it is. The snowmobile clubs have worked hard in helping to maintain the snow park roads with the forest service. To allow a for profit group who has done nothing to help in this area and probably won't is not right. There is already a shelter in the Bear Paw area that is non profit put there for everyone for safety reasons as well as Canyon Creek

and Glacier Creek all three built and Maintained by The Whatcom County Snowmobile Club. To put the permit for the cabin in the same permit app is wrong! These Motorized Snow parks are for motorized vehicles not for money making groups who will try their hardest to push the people who have built the trails. These people are not welcome!
