Comments: Prioritize wild horses, not livestock, on Wild Horse Territories. Round up the cattle instead. Start listening to the voice of the people.

For too long the USFS has accommodated the wishes of the livestock industry, which has been shown time and again to ruin our public lands and waterways, while both the USFS and the livestock industry blames the damage caused by too many livestock on wild equines. You work for all of the American people, not just ranchers. The American people have spoken on this issue many times. We outnumber the ranchers. Our voice on this issue carries much more weight than the ranchers view because we vastly outnumber them. Get rid of the cattle to heal the land.
