Title:

Comments: These places are designated to motorized vehicles. The traffic is already really bad because the motorized vehicles are limited as to what areas they can be used. Second problem is you guys do not maintain the roads the snowmobile association has to do road maintenance every year to make the road drivable, the forest service is not maintaining the ditches, maintaining the culverts or maintaining the washouts I can't even remember the last time you guys had a brush cutter up there cleaning up the saplings and the overhanging brush in the roadway. I like the idea of having a snow shelter, but I do not think these are the places to put them. If you decide to put them here, regardless, I would like to make a motion to have the road paved where needed and additional parking in multiple areas and would like the road ditches and 10' of the shoulder brush cut. And the ditches cleaned out.
