Title:

Comments: I support Alternative 4 which supports actions that:

-- Reduce livestock (sheep/cattle )

--Allow wild horse numbers to increase

--Avoids population control methods such as sex ratio skewing , use of Gonacon, or any substance that could destroy mare ovaries or affect natural wild horse behaviors, or physically harm a wild horse, will not be used.

--Recognizes and re-establishes the original Wild Horse Territory (WHT) boundary.

The EA fails to consider the negative impacts of repeated wild horse removals that have been conducted during the past 8 years. This is traumatic for the wild herds and for the public which supports having wild equines in the WHT to view and observe. No further public land should be zeroed out in the WHT. Private land owners may fence out their land. The negative impacts of livestock grazing on public land health and water resources far outweigh that caused by wild horses and other wildlife.
