Comments: I am against extending the EagleVail trail. I have lived in EagleVail at our west end location for 30 years. I feel like we have one of the few unimpeded animal corridors coming down the mountain. I have seen: deer, elk, a mountain lion, foxes even occasional wild turkeys etc. I'm concerned a developed trail will interrupt natural migrations of these animals.

I also feel the increased traffic will take short cuts to Deer Blvd thru our property. Its devastating to imagine the increased loss of privacy, safety, and quiet enjoyment we have experienced if this plan is realized and all those hikers, riders, and ebikers are multiplied by the dozens in both number and frequency. The bottom line is that the multiple negative impacts of this plan on our natural environment and our safety and privacy far out weight its stated benefits.
