Title:
Comments: As a generational land grant member, prior planning and zoning commissioner, community member and resident, I'm concerned about a prescribed burn in the Sandia Mountains surrounding my community. The forest service decision to do so in communities such as Las Vegas NM in recent years illustrates irresponsible disregard for people inhabiting the areas surrounding families and communities. There are more responsible ways to address the risk of wildfires while protecting generational communities and protecting our historical write, our water rights provided per the protected isequis, and our land grant and the village and placitas canyon and its residents. I and my family adamantly oppose the proposed prescribed burn.
