Comments: I very much support this project! The EV trail is an integral part of my life. And a huge reason that I live here. I use it year round, for recreation and as transit "around town". More soft trails are always welcome. Additionally, I know that locals and visitors alike create social trails through my neighbors' back yards, which is not fair to those property owners.

I look forward to being able to trail run to City Market, and to connect with the Vail Valley multi-use trail where it goes along the river without having to run along hwy 6 as much.

Currently I use the EVtrail to connect to Paulie's and Beaver Creek to go to dinner in the village there at least once a month in the warm season. I'd double or triple that if I could run all the way home on the EV trail!
