Title:
Comments: I have been a resident of EaglVail since 2013 and am an active user of the existing EagleVail trail for hiking and mountain biking, as are my husband and two kids. I fully support the well thought out plan to extend the EagleVail trail as proposed in Project #2351. Formalizing this trail will reduce any potential interference with private homeowners and will increase safe and appropriate access for residents and visitors alike. Trail use has increased and people will continue using informal trails. Formalizing the trails will help control and mitigate negative impacts to land and wildlife. Thank you for your consideration and all that is done to protect the forest!

In support of Project 2351,
Katie Haas
EagleVail resident
