Comments: I am a life long resident of this area. I know the importance of forest management and the incredible risk of devastating fire. I do not support a prescriptive burn set in the driest and hottest time of year. Or actually any prescriptive fire as a first line of intervention. A proposal for other means has been submitted and that should be thoroughly reviewed and employed. The area us high risk and any burn that gets out of control will have devastating consequences. There is only one way in and out of this area. I support a meeting to discuss and share serious concerns.
Thank you.
