Comments: I'm a relatively "new" resident of Placitas, having moved here 10 years ago. Even in that short time, I've experienced the HORROR of watching two fires in the Jemez mountains from my back porch, with the fires running down the mountain ridge like lava flowing from a volcano. Then, to witness the destruction and devastation caused by the Calf Canyon/Hermits Peak fire that has left its indelible mark on those communities (oh yea, that was a prescribed burn too!!). Please keep your forest service "expertise" out of our community. Please give the area residents the overwhelming say in how they would like to have your cooperation in the plan THEY have come up with and are most comfortable as the action plan to reduce fire danger. It's our mountain/forest too.
Much appreciated, Lynne Fusco
