Comments: I appreciate the inclusion of "Provide forest products that help maintain or create processing capacity and infrastructure in local communities." in this proposal. The environmentally extremist policies touted in California and creeping into Wyoming have, sadly, led to almost criminal destruction of forestland. I am not a forest expert, but I love the land, and I am an avid outdoorswoman. I see in this proposal the application of diverse methods to attack the different isdues this area faces. Our forests are just that, ours, belonging to the people of the U.S. as well as to the animals. I hope that the Forest Service can always keep this balance in mind.
