Comments: NO! Please, do not burn in this area! The wind here is vicious and will undoubtably get away from the crew no matter how good their intentions. Manual thinning and removal would be welcome as there IS a great deal of brush that SHOULD be removed, but burning is NOT the answer. I realize we are likely overly cautious due to the previous year's devastating fires you caused, but clearly your leadership is lacking common sense and cannot be trusted to make decisions in the best interest of those living in these areas. Please listen to the locals. NO BURNING! As it is, many in thePlacitas area can now not purchase fire insurance due to your previous actions. If houses burn now, they loose everything!
