Comments: As a resident of Placitas, NM, Sandoval County, I oppose the proposed Forest Service use of prescribed burns in the Las Huertas Canyon and East mountains area.

Yes, there is a lot of fire fuel located in the area, but a prescribed burn, while that may be the easiest way to reduce fire fuels, will also have the largest negative impact to the communities and wildlife in those areas.

Please, do not let anyone perform a prescribed burn in the above-mentioned areas of Sandoval County.

Thank you.
