Comments: Comments regarding Thinning, Prescribed burns, and road building in the Armijo Trail area.
Thinning, and Prescribed Burning in the Armijo Trail area is certainly appropriate. However road building to facilitate contract wood haulers coming and going raises a big concern that could lead to a multitude of problems.
In addition the Armijo Trail is the only legal access to the seven mile Doc Long, Cienega, Sulphur Trail Complex recently completed. The trails are heavily used by hikers,horses riders, and bicyclists It is without a doubt the best complex of short and long trails in the Sandias supporting a variety of outdoor experiences. It's hard to imaging how a road could be built in that same area without totally disrupting access to that trail complex.
Please consider other options for removing the cut timber.
Thank you.
