Title:

Comments: Please consider a different material for the upgraded parking lot. This valley has too much pavement. Please use a permeable surface. Also, while your work to separate user group parking is understandable, paved and painted parking may encourage the type of behavior you see in a grocery store parking lot. Consider the image of a paved lot vs. a "soft" lot and the impression it gives new users. An unpaved lot tells me I'm on Forest Service land.

Also, visitors are often confused about the dog leashing signs in the winter. I get asked all the time. They seem clear to me, but something is not working for them.

Thank you for all your work. WE LOVE CACHE CREEK.
