Comments: Please keep the trails from the overflow parking lot:

Specifically-

A. Trail from overflow parking lot to connect with putt putt / sidewalk exiting north from the overflow parking lot

- This is a very convenient place to park and get on sidewalk trail quickly or access putt putt quickly from the trailhead and is a much better experience than parking at the main trailhead and accessing sidewalk off the cache creek road connector on both bike / foot. Much easier to mountain bike starting here to get onto sidewalk and would be worst to park at the main trailhead. Would also be worse to bike from the main trailhead back down cache creek road to town to connect in with any of the other connectors. This is the best mountain bike access point to the north side.

B. Trail from overflow parking lot heading south to connect with Hagen

Related to this, please ensure the parking spots on the south side of the road are maintained, as this allows direct access (especially helpful with a dog + bike) onto the hagen trail.

By maintaining both of these, it allows for nice and easy looping from the north and south side of the creek, which is not as easy and would require crossing through the parking without these trails which would be a worse experience / increase dog conflict / worse bike flow.
