First name: Jacobus

Last name: Nijenhuis

Organization: Xcel Energy

Title: Right of Way Agent

Comments: Public Service Company of Colorado's (PSCo) Right of Way & Permits Referral Desk has reviewed the Big Meadows Fuel Break Project #64845. PSCo owns and operates existing high pressure natural gas equipment in the proposed project areas. These assets could be at risk of damage from heavy equipment and fire from controlled burns. Depending on the equipment (weight, ground contact area, etc.) and pipeline depth of cover, there are concerns as far as imposed stress on the buried pipeline from surface loading. PSCo is requesting that, coordination and notification take place prior to any work commences.
