Comments: I am an annual user of the Gold Creek rec area in the winter for snowshoeing, and am disheartened to hear that the USFS says that restoration plans for Gold Creek involve no recreational displacement. SO many people walk there in the winter. I am glad of the restoration, but unhappy that we non-motorized winter rec users have one less place to go when there are so few already where one can drive to the trailhead. Can you make another area accessible?
