Comments: Greetings,

I would like to understand more about the immense timeline. Please walk the audience through what I would hope to be an efficient, well thought out, professional project.

In addition, other than shuttering most the pass outside of downhill businesses, what opportunities are being created to offset the construction projects. There are thousands of new recreationalists that have moved here from other areas of the country, the pass Ned's to be as available as possible.

Other than mitigating the bull trout issues, what else is being considered for wildlife?

In five years, many of us will no longer be able to use the pass as we have done over the years and climate change minimizes the snow and winter months.

Thank you.
