First name: Andrew

Last name: Eckels

Organization:

Title:

Comments: Myself and many other backcountry enthusiasts regularly use the sno park that is east of the gold creek pond turnoff and outside of the proposed project area.

Maintaining access to this trailhead is important as snoqualmie pass already regularly has days where parking at all the main trailheads fill up and having this access point will further stress one of the most popular and easily accessible winter recreation areas in the region.

Please allow continued access to this important winter recreation access point.
