Comments: My husband andI attended the meeting on April 24th at the Placitas Community Library. During that meeting the Forest Service Staff, repeated several times that we should direct our comments to this page. So with that in mind I would like to make a few comments:

1. The public comment period should be 90 days as compared to 30 days.

2. The many of the community members of Placitas are very upset and worried about the possibility of using prescribed burning in our area. Burning could put all our homes and properties in great danger.

3. Due to as the Forest Service Staff stated we have been in a 20 year drought burning is not a safe way to control the under growth. There are many other ways to remove under growth and debris. Please explore those other avenues.
