Comments: I have read through the Gold Creek restoration plan and the impact mitigation proposed by the cascade backcountry alliance and I agree with their suggestions. I recreate in the Gold Creek area in summer and winter, probably 3-5 times a year. I also use other areas in the Snoqualmie pass corridor frequently. The loss of use of terrain and capacity over a potentially 10 year period concerns me as many alternative areas are already very busy. Whatever can be done to maintain access to mitigate usable terrain loss and parking capacity in adjacent areas by increasing them or developing new during the restoration timeframe should be part of the overall plan.
