Comments: Community meeting suggestions:
Hire and utilize a civilian corp to assist with thinning the forest in conjunction with the forest service department.

Thin the forest as a first course of action rather than attempted a prescribed burn This has a high percent of going rogue in Placitas high winds and dry arid desert conditions.

Allow residence to be able to obtain permits with take out dead wood for personal fireplace usage in home.

Seek local residence hands-on assistance with conjunction of others to maintain the forest through organized community .

Develop evacuation routes for escape of residence. Currently, we need better infrastructure prior to a forest being set afire.

Better contingency plans on how to protect citizens, homes, property, wild life, & personal pets.

Allow people living in Placitas more community awareness to protect water systems, breathing and personal health standards. Breathing smoke and plume causes lung damage to many elderly compromised individuals living in Placitas.
