Comments: I believe that Gold Creek is an invaluable nature attraction for people who live in or visit Washington State. I do not support the proposal for Gold Creek closure and believe that this must remain a site for public access. The closure of this site for this many years is ridiculous, there are already limited spots where families can easily recreate without significant cost. I've witnessed so many engagements and weddings at this site, it is beloved and should be left alone.

I do not support any of this proposal and do not want this closure to happen. I'm sure funds could be used on better roads to the lake and better facilities.
