Comments: It's absolutely ridiculous to think it's feasible to close the Gold Creek area for up to 10 years not only is it a popular recreation area that takes the burden off many of the other areas on the pass it is a beautiful zone for people who can't get out into the wilderness easily

This is an unnecessary project. The area has been restored from a gravel pit to a beautiful lake and the area around. It does not need to be restored. It is a complete waste of money.

I hope you will reconsider because this does not make any sense for the people of Washington or the people of the pass
