Comments: There is not currently enough information available in the proposed hut plan to make an informed decision.

I am a backcountry skier and snowshoer. From the proposal, I don't know if these huts will be available for unguided use. If so, when and at what cost?

What is the projected usage of these huts? For example, Heliotrope hut has little safe terrain to ski in storm-days.

What is needed to install these huts (e.g., what will the impact to the local environment be?). How will waste and water be managed?

Thanks,

Jim
