Title:

Comments: The Gold Creek Valley is home to two key wildlife underpasses, which have improved wildlife connectivity across I-90 at this high-elevation linkage in the central Cascades. The Gold Creek Valley Restoration Project is the next logical step in repairing past ecological harm caused by a legacy of old-growth logging, gravel pits that helped develop I-90, and human alteration of the ecosystem. I support Conservation Northwest and support this project to abate the long-term unraveling of the aquatic functions in the Gold Creek Valley.
