Comments: I am very against this project! There are so many reasons not to do this! The traffic and wear and tear on i90 from all the trucks not to mention accidents

This beautiful area is already reclaimed from a gravel pit when i90 was being worked on. It is a beautiful area that is easily accessible to people and gets people who wouldn't otherwise be able to get out and hike or picnic access with its flat parking areas and trails. The surrounding areas cannot take the flood of people that usually park and play here as well. This is not only an absolute waste of taxpayer money but a ruining of one of our state's beautiful recreation areas. Do not proceed with this ridiculous project!
