Comments: I attended the information meeting held in Placitas on April 24th 2024 and was very disturbed by the information on the forest service plan to do prescribed burns in the Las Huertas Canyon and East Mountains. As a long term resident (over 50 years) in the Las Huertas Canyon area and part of a Wild Horse sanctuary in the canyon the prospect of setting a fire in the area is unacceptable for people or animals in our community. Options are available with state, local and national entities coming together with our local population to work for a better and safer resolution. The Placitas community has voiced and is willing to work on this situation now, not five years down the road and the forest service and other governmental agencies are not allowing this to happen. Please expatiate our chosen options so that we can start working on this together now not waiting in knowledge of the dire consequences that could happen .Thank you for your consideration,Loyce duLin
