Comments: Hello Forest Service. I am thrilled to hear about the proposed project to restore the ecosystem of the Gold Creek Valley. This is a superb area that has been heavily impacted by gravel mining yet has already served to connect wildlife to areas beyond I-90. Let's do more! I am glad to wait for the work to be done to partially fill in the pond and to prevent access by vehicles - and more! It is crucial to restore the hydrologic regime as much as possible in this drainage. Please do the project as proposed! Thank you.
